

# Fieldglass to Workday — Escalation Guide v1.4

Manulife Financial | Procurement & Contingent Workforce Team

## GENERAL RULE

Always try to resolve at L1 (procurement team self-service) first using the error runbook. Escalate only when the issue requires system access or approvals beyond the procurement team's control.

## WORKDAY HR TEAM

Contact for: Worker not found in Workday, duplicate worker records, terminated profile reactivation, rehire process, name changes requiring legal verification, manager account deactivation.

How to reach: Raise a ServiceNow ticket under category 'Workday HR - Contingent Worker'. Priority: High for same-day needs.

SLA: 1–2 business days standard, same day for critical blockers.

## WORKDAY FINANCE / COST CENTER TEAM

Contact for: Cost center not found, invalid cost center codes, new cost center not yet in Fieldglass.

How to reach: Email Finance Operations at [finance.ops@manulife.com](mailto:finance.ops@manulife.com) with subject 'Cost Center Sync Request'.

SLA: 1 business day.

## INTEGRATION SUPPORT TEAM (TCS)

Contact for: Reference data sync issues (locations, cost centers, job codes not refreshing in Fieldglass), technical integration failures that are not data entry errors, duplicate record linking.

How to reach: Raise a ticket in ServiceNow under category 'Fieldglass-Workday Integration'. Attach screenshots of the error.

SLA: Same day for critical, 1–2 business days for standard.

## FIELDGLASS ADMIN TEAM

Contact for: Fieldglass system access issues, requisition locked and cannot be edited, Fieldglass configuration changes required.

How to reach: Email [fieldglass.admin@manulife.com](mailto:fieldglass.admin@manulife.com)

SLA: 1–2 business days.

## **HIRING MANAGER ACTIONS REQUIRED**

The following errors require the hiring manager to act before the integration team can help: incorrect manager tagged, start/end date mismatch, position not found, location mismatch.

Always loop in the hiring manager first for these error types before raising a support ticket.

## **ESCALATION PRIORITY LEVELS**

P1 - Critical: Worker cannot be onboarded and start date is within 24 hours. Escalate immediately to Integration Support and Workday HR simultaneously.

P2 - High: Worker cannot be onboarded and start date is within 3 business days.

P3 - Standard: Integration error but start date is more than 3 business days away.
