

Fieldglass to Workday — Field Mapping Reference v3.0

Manulife Financial | Procurement & Contingent Workforce Team

WORKER IDENTITY FIELDS

Fieldglass: Worker First Name → Workday: Legal First Name

Fieldglass: Worker Last Name → Workday: Legal Last Name

Fieldglass: Worker Email → Workday: Work Email Address

Fieldglass: Supplier Worker ID → Workday: Contingent Worker ID

Note: Names must match exactly including hyphens, accents, and spacing. Nicknames in Fieldglass will cause a name mismatch error in Workday.

ENGAGEMENT FIELDS

Fieldglass: Requisition Start Date → Workday: Contract Start Date

Fieldglass: Requisition End Date → Workday: Contract End Date

Fieldglass: Work Location → Workday: Business Site

Fieldglass: Cost Center Code → Workday: Cost Center ID

Fieldglass: Position ID → Workday: Job Requisition ID

Note: Dates sync in UTC. If a date is entered in a non-UTC timezone in Fieldglass, a one-day shift may occur in Workday. Always verify dates after sync.

MANAGER FIELDS

Fieldglass: Hiring Manager Email → Workday: Manager Employee ID

Note: The integration looks up the manager in Workday using the email from Fieldglass. If the manager's Workday email differs from their Fieldglass email (e.g. after a name change), the manager lookup will fail and trigger a Manager Not Found error.

WORKER STATUS FIELDS

Fieldglass: Engagement Status Active → Workday: Contingent Worker Status Active

Fieldglass: Engagement Status Closed → Workday: Contingent Worker Status Terminated

Fieldglass: Engagement Status On Hold → Workday: Contingent Worker Status On Leave

Note: Closing an engagement in Fieldglass automatically triggers a termination in Workday. This is irreversible through the integration — only HR can reverse a Workday termination manually.

COMMON SYNC TRIGGERS

The integration sync runs automatically every 2 hours.

Manual re-trigger: Save any field in the Fieldglass requisition record.

If a sync fails, the error is logged in the Fieldglass integration log and an email alert is sent to the procurement support team.
