

Manulife Procurement Policy — Contingent Workforce v4.2

Manulife Financial | Procurement & Contingent Workforce Team

PURPOSE AND SCOPE

This policy governs the engagement of contingent workers (contractors, consultants, temporary staff) at Manulife Financial. It applies to all business units, departments, and subsidiaries globally.

All contingent worker engagements must be initiated through the Fieldglass Vendor Management System and approved by an authorised hiring manager before the worker commences any work.

REQUISITION REQUIREMENTS

All contingent worker requisitions must include: valid cost center code, approved budget confirmation, hiring manager Workday ID, defined start and end dates, work location, and job description.

Requisitions exceeding 12 months require VP-level approval. Requisitions exceeding CAD 500,000 total value require CFO approval.

Retroactive requisitions (raised after the worker has started) are not permitted and will be escalated to Procurement Compliance.

WORKER ONBOARDING PROCESS

Step 1: Hiring manager raises a requisition in Fieldglass with all required fields.

Step 2: Procurement team reviews and approves the requisition.

Step 3: Supplier submits the worker profile in Fieldglass.

Step 4: Fieldglass-Workday integration automatically provisions the worker in Workday.

Step 5: IT access is granted based on the Workday provisioning trigger.

Workers must not be granted system access or begin work until Workday provisioning is confirmed complete.

CONTRACT EXTENSIONS AND AMENDMENTS

Contract extensions must be submitted in Fieldglass at least 10 business days before the current end date.

Extensions beyond 24 months cumulative tenure require HR and Legal review.

Rate changes require a contract amendment in Fieldglass and re-approval by the hiring manager.

OFFBOARDING REQUIREMENTS

Hiring managers must close the Fieldglass engagement on or before the worker's last day.

Closing the engagement in Fieldglass automatically triggers termination in Workday and revokes IT access within 24 hours.

Failure to close engagements on time is a compliance violation and will be reported to the hiring manager's department head.

COMPLIANCE AND AUDIT

All contingent worker engagements are subject to quarterly compliance audits.

Non-compliant engagements (missing approvals, incorrect data, expired contracts still active) will be flagged and escalated.

Repeat compliance violations may result in suspension of hiring manager's requisition approval rights.
