

Fieldglass User Guide — Contingent Workforce Management

RPR Financial Solutions | Procurement & Contingent Workforce Team

OVERVIEW

Fieldglass is RPR Financial Solutions's Vendor Management System (VMS) used to manage the full lifecycle of contingent worker engagements — from raising a requisition through to offboarding. All contingent worker engagements must be managed through Fieldglass. This guide covers the key tasks hiring managers and procurement staff will perform in Fieldglass.

LOGGING IN TO FIELDGLASS

Step 1: Navigate to the RPR Financial Solutions Fieldglass portal via the link provided by the Procurement team or your intranet.

Step 2: Log in using your RPR Financial Solutions SSO credentials.

Step 3: Complete MFA if prompted.

Step 4: You will arrive at the Fieldglass Home dashboard showing your active requisitions, pending approvals, and notifications.

Note: If you do not have Fieldglass access, email fieldglass.admin@rprfinancial.com to request provisioning. Access is role-based and requires manager approval.

CREATING A NEW REQUISITION

A requisition must be raised in Fieldglass before a contingent worker can begin any work. Follow these steps:

Step 1: From the Fieldglass Home dashboard, click 'Create' and select 'Requisition'.

Step 2: Select the appropriate requisition template for the worker type (contractor, consultant, temp staff).

Step 3: Complete all mandatory fields: Cost Center Code, Hiring Manager Workday ID, Start Date, End Date, Work Location, and Job Description.

Step 4: Confirm the budget is approved before submitting — attach budget approval documentation if required.

Step 5: Click 'Submit' to send the requisition for Procurement review and approval.

Step 6: You will receive an email notification once the requisition is approved and sent to the supplier.

Note: Requisitions exceeding 12 months require VP-level approval. Requisitions exceeding CAD 500,000 require CFO approval. Do not submit retroactive requisitions — these are a compliance violation.

SUBMITTING A WORKER PROFILE (SUPPLIERS)

Once the requisition is approved, the assigned supplier will submit a candidate profile in Fieldglass:

Step 1: Supplier logs in to the Fieldglass Supplier Portal.

Step 2: Supplier locates the open requisition and clicks 'Submit Worker'.

Step 3: Supplier completes the worker's legal name (must match legal ID exactly), work email, and Supplier Worker ID.

Step 4: The submitted profile appears in the hiring manager's Fieldglass dashboard for review.

Step 5: Hiring manager reviews and approves the worker profile in Fieldglass.

Note: Worker names must be entered using the worker's full legal name. Nicknames or shortened names will cause a name mismatch error during the Workday integration sync.

TRACKING REQUISITION STATUS

You can monitor the status of any requisition from your Fieldglass dashboard:

- Draft — Requisition has been started but not yet submitted.
- Pending Approval — Submitted and awaiting Procurement or manager approval.
- Open — Approved and sent to the supplier for candidate submission.
- Filled — A worker has been approved and the engagement is active.
- Closed — The engagement has ended and the worker has been offboarded.
- On Hold — The engagement is temporarily paused (worker on leave).

EXTENDING A CONTRACT

Contract extensions must be submitted in Fieldglass at least 10 business days before the current end date:

- Step 1: Locate the active engagement in your Fieldglass dashboard.
- Step 2: Click 'Actions' and select 'Extend Engagement'.
- Step 3: Enter the new end date and confirm the rate remains unchanged (or submit a rate amendment if the rate is changing).
- Step 4: Submit the extension for Procurement approval.
- Step 5: Once approved, the updated end date automatically syncs to Workday via the integration.

Note: Extensions beyond 24 months cumulative tenure require HR and Legal review before approval can be granted.

AMENDING A CONTRACT RATE

If the worker's billing rate changes, a formal amendment must be submitted:

- Step 1: Open the active engagement in Fieldglass.
- Step 2: Click 'Actions' and select 'Create Amendment'.
- Step 3: Update the rate fields and provide a justification note.
- Step 4: Submit for hiring manager re-approval.

Note: Rate changes cannot be applied retroactively. Always submit an amendment before the new rate takes effect.

CLOSING AN ENGAGEMENT (OFFBOARDING)

Hiring managers must close the Fieldglass engagement on or before the worker's last day. Closing the engagement triggers automatic termination in Workday and IT access revocation:

- Step 1: Locate the active engagement in your Fieldglass dashboard.
- Step 2: Click 'Actions' and select 'Close Engagement'.
- Step 3: Enter the actual end date (the worker's last working day).
- Step 4: Confirm the closure. The integration will update Workday status to 'Terminated' in the next sync cycle.
- Step 5: IT access will be automatically revoked within 24 hours of the Workday termination being processed.

Note: Failure to close an engagement on time is a compliance violation and will be reported to the hiring manager's department head.

MANUALLY TRIGGERING AN INTEGRATION SYNC

The Fieldglass-Workday integration runs automatically every 2 hours. If you need to force an immediate sync after making changes:

- Step 1: Open the relevant requisition or engagement record in Fieldglass.
- Step 2: Make any minor edit to a field (e.g. add a space to a notes field, then remove it).
- Step 3: Save the record. This triggers the integration to re-process the record immediately.

Note: If the sync still fails after a manual trigger, check the Fieldglass integration log or raise a ServiceNow ticket under 'Fieldglass-Workday Integration'.

VIEWING THE INTEGRATION LOG

The Fieldglass integration log records all sync attempts, successes, and failures for each engagement:

- Step 1: Navigate to the engagement or requisition record in Fieldglass.
- Step 2: Click the 'Integration' or 'Activity Log' tab (depending on your Fieldglass view).
- Step 3: Review the log entries for any error messages. Error codes and descriptions are documented in the Error Runbook.
- Step 4: If the error is not in the runbook, raise a ServiceNow ticket and attach a screenshot of the log entry.

COMMON TIPS AND BEST PRACTICES

Always use the worker's legal name — exactly as it appears on their government-issued ID.

Always verify the cost center code in Workday before entering it in Fieldglass.

Always enter dates in the correct format (DD/MM/YYYY) and be mindful of UTC timezone implications.

Never raise a retroactive requisition. The worker must not start before the requisition is approved.

Monitor your dashboard weekly for upcoming contract expirations and pending approvals.

GETTING HELP

For Fieldglass access issues: Email fieldglass.admin@rprfinancial.com

For integration errors and sync failures: Raise a ServiceNow ticket under 'Fieldglass-Workday Integration'.

For requisition guidance and procurement queries: Contact the Procurement Centre of Excellence at procurement.coe@rprfinancial.com.

SLA: Access issues resolved within 1–2 business days. Critical integration blockers resolved same day.
